Platform Engineering
Umbrella Health

Dear Hiring Manager,

I'm applying for the Senior Backend Engineer role on your Platform team. For the last eight years I've built payment and logistics APIs that need to be fast, correct, and easy to run at 3 a.m.

At Globex Payments I cut checkout latency from 820 ms to 190 ms and led a zero-downtime migration of 40 million records to PostgreSQL. Before that, at Initech Logistics, I built a Go tracking API serving 15k requests per minute and reduced cloud costs by 31%.

I'd love to bring the same care for reliability and clear documentation to Umbrella Health. Thank you for your time.

Best regards,
Jane Doe
